## New Maitre sizes - all your needs covered

Only at  
GIBPAT

**Bauscher will easily take you through your menu with extra sizing on a favourite basic.**

### Maitre users and beyond

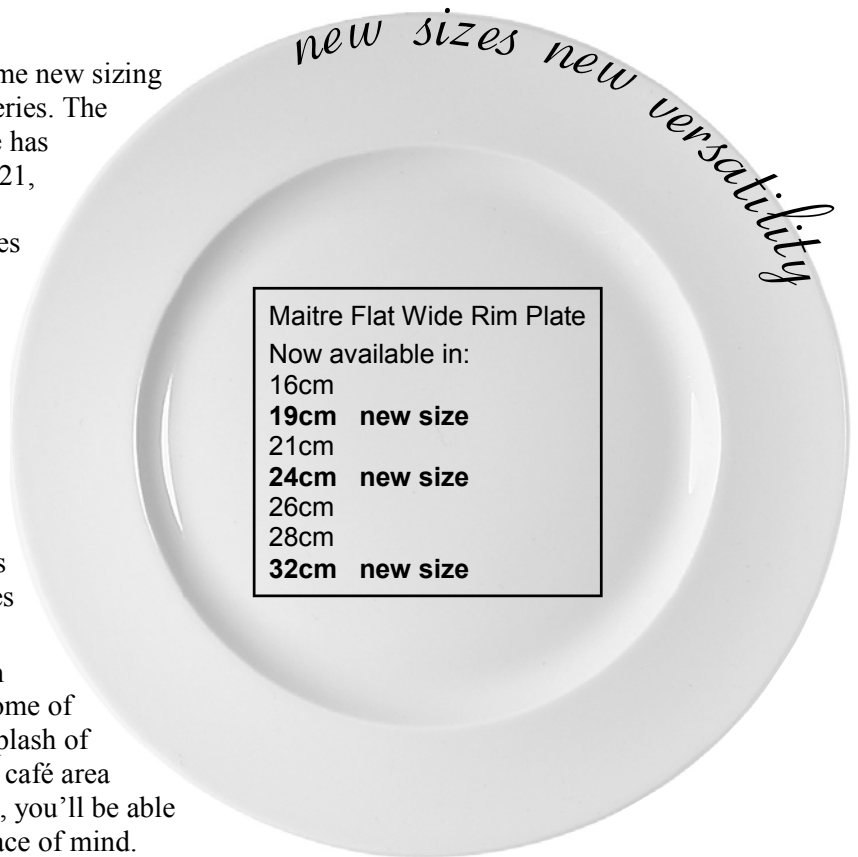

Bauscher has just released some new sizing for its long running Maitre series. The classic wide rimmed flat plate has long been versatile in its 16, 21, 26 and 28cm sizings. Now available in the additional sizes

of 19, 24 and 32cm, this plate really will take you through the entire menu.

Not using the Maitre collection? Take a look at the simple, yet elegant lines of this plate. This beautiful white hard porcelain will fit in with your existing chinaware with ease. And because it's made by Bauscher, you can be assured of true value for money because of its hard wearing qualities.

Bauscher build chip resistance into their design, as well as firing their porcelain at very high temperatures to make it extra tough.

And for those of you that feel like a little colour in your lives, we've included a few samples below of some of the colour you can get on your Maitre plates. Use a splash of colour on a show plate in your fine dining, or in your café area for a bit of fun. And don't forget, unlike other brands, you'll be able to get replacements for many years to come. Real peace of mind.

Lots more show plates and plain colours available. Call us for a brochure today.
