'Structure' plate

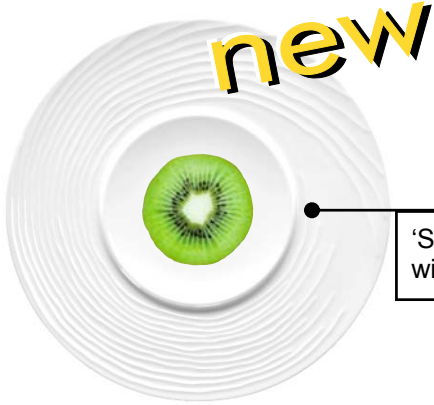

quality commercial catering equipment

New addition to Compliments

Bauscher has released a new plate called 'Structure' to add to the Compliments range, released in 2007. Compliments was the first new collection designed by Bauscher to be used as an add on to your existing tableware. This innovation not only introduced stunning options for your special menu items, it provided a new way for you to create a truly individual tabletop for much less outlay. Structure features a nature inspired relief on a wide rim and comes in 17 and 34cm.
