Catering for every trend

Bauscher has just launched its latest collection called Pleasure. This new product range is specifically designed to make every dining trend a memorable experience for the diner, whether the cuisine is fusion, crossover or molecular. With Pleasure, Bauscher is bringing porcelain up to the creative level of the chef.

Pleasure lifts the limits on the fun of creative experimentation and meal presentation. Simple and elegant flowing lines make sure the spotlight is firmly on food creations, letting you leave the familiar and ordinary behind and create something unique.

Real value for money

- Bauscher hard porcelain will stand a minimum of 3,000 dish washings, which is approximately three times that of softer glaze products.
- Bauscher use a firing temperature of over 1,400°C. This makes the glaze insensitive to rough handling and even the sharpest knife blades will leave no trace.
- Resistance to chipping is exceptionally high as a result of the strength built into the shape right from the start.
- You won't get collections of dirt stuck in nooks and crannies after dishwashing because there aren't any.
- All rims and feet are fully glazed and polished, meaning there will practically never be any traces of lipstick or tea.
- Bauscher offers long term availability of product, so there are no worries about top ups in future years.

Cup and Saucer:
90, 180, 280ml

Platter, special:
32x14cm
