A white variation

For those of you who love the softer off white look, the arrival of Bauscher's Raffinesse in 2006 was a triumph. Finally, the delicate hue of bone china had been translated to Bauscher's famous hard porcelain. Bauscher's stunning new range, Silhouette, continues this beautiful off white story.

Setting the stage for individuality, Silhouette will allow you to truly delight your guests. All dishes have been designed to allow chefs to make a real style statement.

The Bauscher advantage

Bauscher have been manufacturing hotel porcelain since 1881. Nothing else. Much of what is now regarded as standard, originally came from Bauscher. True value for money comes from the superior Bauscher product that doesn't chip as easily. Less breakages, less replacements.

Extending the tabletop

Silhouette's new shapes not only take centre stage but co-ordinate beautifully with the existing Raffinesse collection to extend versatility further. Raffinesse already incorporates a large range of different shaped plates, bowls, high tea dishes, individual portion items and other accessories, and provides the perfect backdrop to showcase Silhouette.
