*We are proud to announce the arrival  
of the TD 3000 Cutlery Polishing,  
Drying and Sterilising Machine.*

This new addition doesn't need to sit on the floor like it's big brother.

Our new baby is small enough to pop up on a table and use. If you have a restaurant or club, this is the machine for you.

For those of you new to this concept, here's how our machines work:

**Washed,  
Wet  
Cutlery IN**

**Vibrates through  
warm granulate  
and UVC lamp**

**IT'S SO QUICK  
AND EASY!**

**Dried,  
Sterilised,  
Polished  
Cutlery OUT**
