# COATED PANS

Your days of replacing  
expensive porcelain  
pans are over!

We have developed an exclusive product . . .

quality commercial  
catering equipment

These heavy duty stainless steel Idesta gastronorm pans are coated with a special flexible food safe finish called 'hard-coat' (it's not Teflon).

**Drop these, and at worst, they will dent.**

Designed for use in hot and cold bain maries as well as chafing dishes, they are available in black and white (they are not designed for oven use). We have come up with a range of standard sizes that we feel will cover most needs, however we can coat any other sizes, including round, on a case by case basis.
