# JACKSTACK®

Invented *by* a chef  
*for* the chef

Lack of space is a big problem in any professional kitchen. Go from eight square metres of horizontal storage to half a square metre of vertical storage for 104 plates.

- 20% less labour
- 25% less serving time
- 30% more space

## Wheel In Storage

Model	No of Plates	Arm Spacing	Height
JS104	104	low	179cm
JS072	72**	high	179cm
JS104/9	104	low	179cm

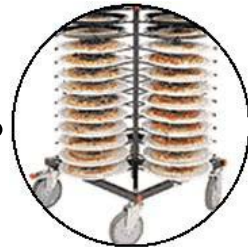

Even this big JS104 is easily moved by 1 or 2 staff to your storage or banquet areas

\*\*Use with plate covers

### "Tower of Pizza"

Longer arm length of 23cm, Stack up to 104 pizzas of any size.

Handles thin pan and deep dish

All swivel wheels are a big 15cm for extra stability

Jackstack plate racks are a welded steel construction. The black electrostatic powder coat finish is scratch and rust resistant. The plate racks only need a regular wash.

## Accessories

Model	Description
JS901PC	Zippered plastic cover for JS104, JS088 or JS072. Protect food longer, keep fresher in cold storage.
JS104TC	Universal thermo cover for JS104, JS088 or JS072. 72 to 104 plates with warm or cold food in a transportable cabin.
JS914EA	30cm extension arms that slip over any existing 17cm arm. Great for trays or pizza pans.

## Arm Spacing

'Low' means there is a 5cm spacing between the plate supports

'High' refers to an 8.2cm spacing between supports which means you can use plate covers

Don't need plate covers? The JS104 has low arm spacing.

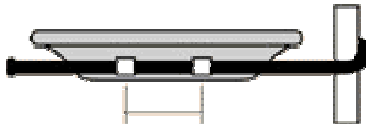

If you need plate covers, the JS072 has high arm spacing.

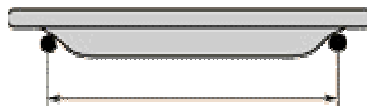

The units are easily moved by one or two staff in a minimum amount of time to storage or banquet areas

Your plates are safe thanks to these fast to use features. Simply slide and set to any plate size in seconds.

## Plate Safety

Anti-Slip O-Rings

End Stops
