### Light up

Of course, even the most beautiful table setting wouldn't be complete without mood lighting. Rechargeable candles, as well as offering a much safer option than open flame, have no messy wax to clean up and produce no heat. For those outdoor dining areas there are no more worries about candles blowing out, and because they turn on with the quick flick of a switch, your staff will have more time for other duties.

### At a glance

- 12 hours of flickering candle light per charge
- Individual candle on/off switch on bottom
- 8 hour simple dock and re-charge system with battery charge indicators (initial 20 hour condition charge)
- Up to 4 charging trays can be connected to one adaptor
- No heat - the candles use LED technology
- No open flame and no messy wax
- Lifespan of candles is approximately 5 years (based on 6 hours per day operation)
- A variety of colours available, including a colour change candle
- A variety of glass holders in different colours is available

**Smart Candle Rechargeable**  
Available in amber, red, green, blue, warm white (pictured above) and colour change.

How it looks - the Rechargeable
