Fabulous, funky, functional - our new chairs

new

Restaurant, lounge, bar, lobby, guest room . . .

We can't decide where these chairs would look best because we know they would look great in any of these locations. They offer the perfect combination between old and new, delivering a modern funky style yet still retaining that old world charm that shouts comfort and quality. And we love the new fabrics.

Tough and practical banquet chair design was the starting point for this new range of chairs. As a result, these chair frames are made from tough yet lightweight aluminium. As well as a wide choice of solid frame colours, you can choose from realistic wood look finishes (pictured below). Strong legs with a delicate look that will outperform their wooden counterparts. Combine with a tough scotchguarded fabric and you will get more wear from your chairs before you have to think about replacing them.

We'll have more new arrivals throughout the year and hope to bring you some new chairs in the next few issues of the eZine.
